at the touch of a button™

CONSISTENTLY GREAT COFFEE

Newco's LCD-2 liquid coffee dispensers are a great way to deliver consistently delicious coffee at the touch of a button. Our delivery system ensures highly accurate product to water ratios while protecting the extract from air ensuring the integrity of the coffee.

SPACE SAVING DESIGN

At only 9.5" wide, the LCD-2's sleek design respects your counter top space and delivers a high quality product in a small footprint. All models accommodate two ½ gallon bag-in-box (BIB) shelf stable products (non refrigerated).

SIMPLICITY

The LCD-2 series delivers hot and fresh coffee at any time of day. Eliminate waste and stale coffee while reducing labor cost and coffee preparation

UNMATCHED FLEXIBILITY:

Our soft touch membrane panel can be easily programmed to dispense your products in a variety of ways: Press and hold or Portion Control, Multiple product strengths (Mild, Regular or Bold) and temperature (hot or ambient). All of the functions are built into the LCD-2 dispenser. The only thing required is to choose the options that are right for you.

ILLUMINATE YOUR SALES:

Vibrant LED backlight display attracts customers and broadcasts that the LCD-2 is ready to serve.

Hot Liquid Coffee or Tea Dispenser

When it comes to coffee, everyone needs options. Newco's LCD-2 gives the flexibility to serve each product in up to three varying strengths (Mild, Medium or Bold) helping to promote sales and satisfy each consumer's taste profile. Whether you are serving coffee or tea, you can rely on Newco's highly accurate dispensing system to deliver a perfectly consistent product.

The LCD-2 hot model also doubles as an iced coffee dispenser (ambient temperature). Simply program the hot water tank off, change the graphics and the unit is now ready to dispense your coffee over ice.

Let us know the configuration you would like and Newco will custom build your LCD-2 dispenser at no additional charge.

Accommodates most 20 ounce cups and Newco 1.9L thermal carafe (Item #111445).

Interchangeable labels allow the LCD-2 to be set or customized for each of your locations.

LCD-2 Ambient Only

The LCD-2 Ambient only model is the perfect solution for adding iced coffee drinks to an existing coffee program. No need to prepare and cool down coffee in order to serve. Simply press and dispense. LCD-2's compact design makes placement easy in

virtually any location. The vibrant LED backlight display promotes a gourmet image of the iced coffee offering and encourages sales.

LCD-2 Combo

Consumer demand for iced coffee drinks continues to be on the rise and the LCD-2 is ready to deliver. Our combination LCD-2 unit is the ultimate in liquid coffee dispensing. Now you can serve your coffee either hot or over ice from the same machine.

Increase your sales by offering iced drinks without the additional expense of a secondary piece of equipment. With the ability to program individual ratios for each dispense button, you can ensure your drinks taste perfect either hot or cold.

The LCD-2 with faucet dispense is designed for locations that prefer a more traditional style of dispensing coffee on demand. Each faucet can be set to deliver coffee at an individual ratio while the hot water faucet is available for allied product sales. A locking cabinet helps increase product security while the large graphic panel promotes a high quality image of your products.

Options and Features

The LCD-2 series of equipment come standard with the following features and specifications unless noted:

Accommodates two ½ gallon (1.9L) bag in box (BIB) products with box dimensions of 8.6" H x 4" W x 6" D or smaller.
